Reference Letter

To whom it may concern,

At the request of Jie Zeng, I am writing this recommendation letter to support his application to your esteemed program. I acquainted with Jie Zeng when he worked as intern from July to August 2021 and I witnessed he was well performed and qualified candidate during this period.

During his internship, he was mainly responsible for building two CentOS7 operating systems using VMvare and SecureCRT, building MySQL database respectively, using Python program code to update the data of journals and magazines, and learning the underlying data structure of MySQL. He has obtained valuable experience in tuning the MySQL database.

I have known Jie Zeng as a resourceful and goal oriented individual. Jie Zeng often raised thought-provoking questions during our cooperation. Thus, it is nature that I like discussing with this young person and enjoy becoming more familiar with him and his aspirations. The more I get to know him the more I find Jie Zeng is talented at this industry. With his outstanding talent and solid background in this field, he also did quite well in most of his other projects during his work period.

In addition, what I also wish to mention is the mature personality of Jie Zeng. On the one hand, he has a stable mood, excellent anti-pressure ability and overall management ability for different tasks. On the other hand, he has developed and built good interpersonal relationships among others, with his easy-going personality, open mind, and a good willingness to help others who are in need. Due to his mature personality and warm heart, he is very popular within our team.

I believe Jie Zeng meets the admission requirements of your distinguished university. Meanwhile, his ability to work in a team can also facilitate his integration into the collective in an unfamiliar environment. After taking full consideration of his own strengths and weaknesses he made this choice. Therefore, I strongly support his decision.

If there is anything unclear, just feel free to contact me.

Sincerely,

Mr. Yuhang Liu
